

# Catching machine

Catching capacity	BPH	9.000
Weight	kg	2.600
Length	mm	9.650
Width	mm	1.450
Height	mm	2.050
Catching range	m	20
Engine Deutz 1022 F3L	kW/hp	35.8/48
Four-wheel drive hydraulic Power transmission		
Hydraulic gearbox		
Radio controlled steering		

## Catching machine

- No damage of the animals by the extremely careful way of catching.
- The chickens don't panic during catching and peacefully sit and stay in place.
- Substantial decrease of physical work strain on your employees: The catching machine is operated by only one person.
- The whole process of catching and loading is executed by three employees.
- A catching crew can catch and load up to 9,000 chickens per hour.
