

# Shuttle

Maximum loading capacity	kg	900
Animal live weight	kg	1.5-3.5
Shuttle weight	kg	3.750
Shuttle length	mm	6.000
Shuttle height	mm	1.500
Shuttle width	mm	2.200
Maximum lifting height	mm	3.800
Horizontal movement	mm	120
Drive speed	km/h	7
Belt speed	m/min	7
Engine Deutz 1022 F3L	Kw/hp	35.8/48
Driven wheels	pc.	4
Steering axles	pc.	2

## Shuttle

- With two shuttles, one is able to fully load the Peer System trailer within an hour with a maximum of 18,000 kg (39,683 lbs.) of poultry.
- Shuttles have an efficiently built-in automatic weighing system: the all up weight of the load is exactly known.
- With two shuttles, a catching machine and three employees the trailer is fully loaded within one hour.
